P9185 - Project 3: A Pilot Cluster-RCT of Asthma-PASS in Bronx Elementary Schools

Kate Colvin

April 23, 2026

I. Introduction

II. Methods

$$SFD_{ijt} \sim \text{Beta-Binomial}(14,\ p_{ijt},\ \phi)$$
$$\text{logit}(p_{ijt}) = \beta_0 + \beta_1 \text{Time}_t + \beta_2 \text{Group}_j + \beta_3 (\text{Time}_t \times \text{Group}_j) + s_j + b_{ij}$$
$$s_j \sim N(0, \sigma^2_{\text{school}}, \quad b_{ij} \sim N(0, \sigma^2_{\text{child}}), \quad \text{logit}(\pi) = \gamma_0$$

III. Results

IV. Discussion & Limitations

V. Appendix

Table 1: Distribution of Memory Score by Study Day.

Table 1: Baseline Symptom-Free Days and School by Intervention Group

Characteristic	**Overall** N = 108[1]	**Control** N = 49[1]	**Intervention** N = 59[1]
Symptom-Free Days	11.00 (7.00, 13.00)	11.00 (7.50, 13.50)	11.00 (7.00, 12.00)
Unknown	3	1	2
School			
School 1	28 (26%)	0 (0%)	28 (47%)
School 2	21 (19%)	21 (43%)	0 (0%)
School 3	31 (29%)	0 (0%)	31 (53%)
School 4	28 (26%)	28 (57%)	0 (0%)
